### **License Agreement:**

You the buyer are allowed to use the presets on "your" machines as the authorized user. If you sell a computer please remove the presets. You may not re-distribute or give Seim Effects to others. We try to be easy going and our tools have no DRM, so this is an honor system. Please respect our effort, help keep prices low and quality high and please send friends to [seimeffects.com](http://seimeffects.com) to grab their own.

### **Getting Help:**

Visit [www.seimeffects.com/help](http://www.seimeffects.com/help) if you need help updating your presets or are having any issues. Start at the help page for common answers. If you need further assistance don't hesitate to contact us (page 2).

### **Using The Presets:**

1: Start by unzipping the file you downloaded. Save it to your desktop or any other location thats easy for you to find.

2: Navigate to the preset folder and select the correct set for the version of Lightroom you use. Right click and "Copy" the entire folder of presets.

3: Next you need to install the presets into LR at which point you'll be able to apply them using the Library and Develop modules. Go to Lightroom Settings (Preferences). Next Find the Presets Tab/ Click the button that says "Show Lightroom Presets Folder" When that folder opens select the "Develop Presets" folder.

4: Right click inside and then "Paste" This will paste in the main presets folder you copied in step 1.

**Sample RAW Files:** Included in the set are a few of my uncorrected DNG base images for you to experiment on. These are full resolution files and are great for trying out the effects of various tools. Feel free to play around, but don't claim the resulting images as your own, or use in your portfolio. Included images are copyright Seim Studios LLC. I'll trust you to use them honestly.

**Updating your presets:** If you're updating from a previous version, this latest version is meant to completely replace it. Simply delete the the old set and replace it with the new collection included in this download

Version Release Notes.

**V2.5 Release Notes: April 3<sup>rd</sup> 2015.**

Major updated. Added about 5 new presets (marked with NEW 2.5). Also updated many presets throughout the collection. These will be notes 2.5. Gave special attention to better tonality and rich contrast. Also remove some redundant presets and generally clean house to make the set more usable.

**V2.2 Release Notes: March 1, 2012.**

Added a new LR4 version of Silver Shadows 2. It mirrors effects with the LR1-3 set, but this set is revamped to leverage the new LR4 process. This new set will work the same on all file formats in LR4. JPEG, TIFF, PSD, RAW.

**V2.0 Release Notes:**

Silver Shadows 2 is here and it's ready to rumble.
